

Pulse by Conexus

People & HR Platform

Tester's Step-by-Step Testing Guide

Based on Product Specification v3.1 | Laravel 11 + MySQL 8 + Livewire 3

10 Test Modules

All Shifts & Roles

Priority Order

What is Pulse? Quick Overview for Testers

System Overview

- Self-hosted HR platform (India-based team)
- Two shifts: IT (10:30–7:30) & UK Sales (1:00–10:00)
- 18 leave days/year: 12 CSL + 6 Dec MDL
- OT Rate: ₹100 per hour (pre-approved only)
- Two salary cycles: Cycle A (1–31) & Cycle B (21–20)
- Financial Year: July 1 – June 30

10 Modules to Test

- 1 Login & Roles (RBAC)
- 2 Attendance (Clock In/Out)
- 3 Leave Management
- 4 Overtime (OT)
- 5 Payroll & Payslips
- 6 Notifications (Bell Icon)
- 7 Performance Reviews
- 8 Onboarding / Offboarding
- 9 Document Management
- 10 Security & Mobile

Step 1 — Login & Roles (RBAC) Testing

PRIORITY: ★★★★★ | Test First — All other modules depend on this

Role	Who	What They Should Access
Super Admin	Mazhar	Full system — all modules, settings
HR Admin	Shivani	All HR modules except system config
Dept Head	Rustom / Nick	Own department data + approvals
Finance	Emad	Salary/payroll only + read attendance
Employee	Any staff	Only own data: attendance, leave, payslips

Critical Security Tests

- ✗ Employee tries to open another employee's payslip URL directly → **Must be BLOCKED (403)**
- ✗ Finance user tries to approve leave → Must be BLOCKED
- ✗ Manager tries to view another team's data → Must be BLOCKED

Step 2 — Attendance Testing

IT Shift

10:30 AM – 7:30 PM

Clock-in by 10:35 AM = ✓ On Time

Clock-in at 10:36 AM+ = ● LATE FLAG

Grace Period: 5 minutes only

UK Sales Shift

1:00 PM – 10:00 PM

Clock-in by 1:05 PM = ✓ On Time

Clock-in at 1:06 PM+ = ● LATE FLAG

Grace Period: 5 minutes only

Break Testing

- Multiple Start/End breaks allowed
- Total < 60 mins → ✓ No issue
- Total > 60 mins → ● Excess break flag + notification to employee & manager

Missing Clock-Out

- Employee clocks in but NOT out
- After shift end + 1 hour → auto flag
- System sends in-app notification
- No email sent — in-app only

Regularisation

- Employee submits correction request
- Manager gets notification
- Approve → attendance updated
- Reject → employee notified
- Original values saved in audit trail

Step 3 — Leave Management Testing

Leave Type	Days	Half Day?	Carry Fwd?	Encashable?
CSL (Casual/Sick)	12	✓ Yes	✓ No lapse	✓ With approval
MDL (Dec Shutdown)	6	✗ No	N/A	✗ No
Comp Off	Earned	✗ No	✓ No lapse	✗ No
Public Holidays	—	—	—	Non-working days

Apply & Approve Flow

- Employee applies CSL leave
- Manager notified in-app
- No action in 24hr → HR Admin escalation
- Approve → balance decreases
- Reject → employee notified

Block Tests (Must Fail)

- Apply leave with 0 balance → BLOCKED
- Apply on MDL day → BLOCKED
- Overlap with approved leave → BLOCKED
- MDL half-day → BLOCKED

December MDL Rules

- 6 specific Dec days are pre-blocked
- Employee cannot apply other leaves
- Working on MDL day → +1 Comp Off
- Comp Off never expires

Encashment Flow

- Employee requests CSL encashment
- Director + HR Admin notified
- On approval → CSL balance reduces
- Amount added to payroll as line item

Steps 4 & 5 — OT and Payroll Testing

⚡ Overtime (OT) Testing

OT Rate: ₹100/hour | Pre-approval REQUIRED

✓ CORRECT OT FLOW

1. Employee submits OT request in advance
2. Manager approves it
3. Employee works late that day
4. System: OT hours = total_hours – 9
5. OT amount = hours × ₹100 in payroll

✗ MUST FAIL — Block These

- ✗ Work late WITHOUT an OT request → No OT counted
- ✗ OT request rejected → Hours not paid
- ✗ OT request for past date (not allowed)

💰 Payroll Testing

Net Pay Formula:

Basic + HRA + Allowances
+ OT Amount (approved only)
+ Incentives (Director-approved)
+ Reimbursements (approved claims)
+ Leave Encashment (if approved)
– Deductions
= NET PAY

Payroll Approval Flow:

- 1 HR Admin locks attendance & leave data
- 2 Draft payslips generated for cycle
- 3 Finance (Emad) reviews + approves
- 4 Payslip PDF emailed to employee ✉️

Step 6 — Notifications Testing

✉ Email Sent — ONLY 3 Cases

1. Payslip issued (PDF attached)
2. Account created / Password reset
3. Final settlement on offboarding

⚠ Everything else = IN-APP only (bell icon)

🔔 In-App Notifications to Test

- Leave submitted → Manager notified
- Leave approved/rejected → Employee
- OT request submitted → Manager
- Excess break (>60min) → Employee + Manager
- Missing clock-out → Employee
- Payroll ready → Finance (Emad)

🔔 Bell Icon Behavior Tests

Unread badge

Bell shows count of unread notifications

Mark all read

'Mark All Read' button clears all unread at once

Click to read

Opening notification marks it read (read_at timestamp set)

Auto-prune

Notifications older than 90 days are automatically deleted

Polling

Badge count refreshes every 30 seconds (no page reload needed)

Steps 7, 8 & 9 — Performance, Onboarding & Documents

Performance Reviews

- Quarters: Q1 Jul-Sep, Q2 Oct-Dec, Q3 Jan-Mar, Q4 Apr-Jun
- Employee does self-assessment first
- Manager then rates each KPI
- 7 days before quarter end → reminder notification
- Director + HR Admin define KPIs per quarter
- Check: promotion_flag visible to manager only

Onboarding / Offboarding

- New hire: all 10 checklist tasks assigned
- 30-day mark → auto notification to manager
- 90-day probation → notification to manager + HR
- Exit: employee access revoked on last day
- Record NOT deleted — status set to 'inactive'
- Final settlement flows into Compensation module

Document Management

- Employee can only see their own docs
- HR uploads with 'acknowledgement required'
- Employee gets notification to acknowledge
- Expiry date set → notify HR Admin 30 days before
- Re-upload = new version, old version retained
- Payslip links expire in 5 minutes (signed URL)

Step 10 — Security & Mobile Testing

Security Test	Action	Expected Result
Direct URL Access	Employee types another user's payslip URL	● 403 Forbidden — Blocked
SQL Injection	Type ' OR 1=1 in form fields	● No data leak — Blocked
HTTP Access	Open site via http:// instead of https://	● Auto-redirects to HTTPS
Payslip Link Expiry	Open payslip PDF link after 5 minutes	● Link expired — Blocked
Session Timeout	Leave browser idle for 8+ hours	● Auto logged out
File Upload	Try uploading .exe or .zip file	● Rejected — PDF/image only

Mobile & Responsive Testing

- ✓ Open Pulse on mobile browser — all pages must load correctly
- ✓ Clock In/Out button must be tappable and functional on mobile
- ✓ Leave request form must be fillable on small screen
- ✓ Notification bell must work and show unread count on mobile
- ✓ Payslip PDF download must work on mobile browser

Testing Priority Order — Where to Start

1

Login & Roles

All other tests depend on correct role access

2

Attendance

Core daily feature — clock in/out, breaks, late flags

3

Leave Management

Complex rules: CSL no-lapse, MDL block, comp off

4

Notifications

Used across ALL modules — in-app vs email rules

5

OT & Payroll

Pre-approval mandatory, formula accuracy

6

Security

RBAC enforcement, signed URLs, session timeout

7

Performance

Quarterly KPIs, self-assessment flow

8

Onboarding/Exit

Checklists, 30/90 day reminders, access revoke

9

Documents

Acknowledgements, expiry alerts, version control

10

Mobile Responsive

PWA-ready: all flows work on mobile browser
